

FCI Berlin

Berlin, New Hampshire

This Design/Build Project includes all architectural, engineering, construction, project management, quality control and commissioning services. This 600,000 SF facility will house approximately 1200 inmates in (3) four-story general housing units, and (1) two-story special housing unit. The complex also includes several one story buildings for educational, vocational, health, administrative and food services within a secure compound.

Located outside the secured compound is a Central Shared Facility comprised of a utility plant, a warehouse, a garage/landscape building, a fueling station, and a hazardous materials building.

In addition, a medium security Federal Prison Camp with housing and support facilities for 128 inmates will be located outside the secure compound. This project also includes a weather corridor that links all buildings within the secured perimeter.
