

## Fort Drum Aviation Facilities

Fort Drum, New York

General construction for the complete Aviation Facility including hangars, helicopter pads with security systems, taxiways, lighting systems.

The project involved the installation of a jet fuel storage and distribution system, 1.5 million cubic yards of earthmoving, 90,000 tons of asphalt, 60,000 cubic yards of concrete, 300,000 square feet of hangars, a control tower, and an administration building.

The project was completed 12 months ahead of the contract requirements that called for a 32-month schedule.
