

Robins AFB Health and Wellness Center

Warner Robins, Georgia

Bell was the General Contractor for this 100,000-square-foot free-standing addition to an existing hospital complex.

The new addition houses outpatient clinics for Primary Care, Internal Medicine, Pediatrics, General Surgery, Orthopedics, ENT/Ophthalmology, OB/Gyn, Physical Therapy, Pharmacy, Dentistry, and outpatient waiting areas.

After completion of the new addition, three consecutive phases of renovation took place in the existing hospital. The renovated areas included radiology, laboratories, and an information systems area.

Bell self-performed all utilities and earthwork, concrete forming, shoring and placement, interior and exterior metal stud erection, sheathing and sheetrock, plumbing and med gas piping, mechanical piping, sheetmetal, and installation of the medical, dental and radiography equipment.
